

To the lawmakers who would enact more gun control:

I have noticed a real push to enact more and more control on our populace thru gun control. More and more of your voters are demanding that action be taken.

Unfortunately the path that seems to be on the agenda is one that will not have the result that you have said you desire.

I will include references below to what I am about to say.

Banning guns will not keep criminals from getting them according to a DOJ survey about 2% of criminals in our Justice system bought through a retail outlet or at a gun show.

The streets of Chicago are well know to be violence central yet some of the toughest gun laws are in effect there.

Banning of high capacity magazines won't save people. In fact the Parkland shooter used 10 round magazines to kill all those presious children.

The bills in reference to so called assault weapons ban a weapon based on it's cosmetic looks.

Also rifles of any kind are used less than hammers in gun deaths.

In short what is being proposed is not only not going to make people any safer. It will actually make it more difficult for good people to defend themselves from those who would do them harm. How many rapes and murders will come about because good people were unable to defend themselves?
