

I'm a resident of Salem OR and wish to voice my opposition to SB978 on the basis that is infringing on my 2nd Amendment right to protect myself and my family. Please tell me how I'm able to do that if I follow the things you have written in this bill?

I am concerned about the direction you are trying to take our country in violating my rights. Maybe if you would focus on the mentally sick people and the criminals who you know will not follow your laws, you just may solve some of the nations problems. It seems as though when there is a shooting your first response is to disarm the law abiding Gun Owners.

I keep hearing that we aren't supposed to own these modern rifles because they look like the military ones I fired when I was in the Army. My dear friends the 2nd Amendment does not change because of the advancement of science. The reason the Constitution was written is because a tyrannical govt. (England) was trying to dis arm the colonists. Correct me if I'm wrong but it seems that politicians both state and federal are in the mode of trying to ultimately do just that.

I am asking you as honorable people to stop this foolishness because you are driving the people of America into dealing with it as our Founding Fathers did.

I WILL NOT COMPLY!

I have around 150 friends who have said the same to me,
some of my Law Enforcement friends said they will not enforce it so listen to us.

Sincerely;
Gary Atwood
