BACKGROUND:

The Uniform Anatomical Gift Act (UAGA) is a federal law, first declared in 1968, that created the regulatory framework for the donation of organs, tissues, and other human body parts in the United States. Both Oregon Health and Science University (OHSU) and Western University of Health Sciences, College of Osteopathic Medicine of the Pacific (COMP-Northwest) operate whole body donation programs that allow an individual to gift her remains for use in helping to educate health care professionals.

Senate Bill 144 applies certain provisions of Oregon's codification of the federal UAGA to gifts of the whole body.
