I am TOTALLY OPPOSED to any form of any Green New Deal legislation. This bill will destroy any place that inacts it, it is EXTREMELY expensive, and tries to solve problems that are not in our control. I do believe we need to take care of our environment, I do believe we need to have clean air and water. We have made SO MUCH PROGRESS since I was aware in the 1970's, we have been told over and over and over again since the 70's when we were going to be locked into an ice age and we were doomed in 10 years by scientists who then developed a different reason we were doomed in 10 years that they have become a joke. This green new deal is a destroyer of all aspects of our life without the benefits promised to prevent a destruction that past experience tells me is apt to not happen.
