Dear HB 2824
Comittee,

My name is Amaya Woolley and I am 8 years old.

I'm giving you this handmade item because I want you to know that protecting the environmental health of Oregon and planet Earth is of *utmost* importance to me because the choices that *you* make as a legislator will affect not just your generation and my parents', but *especially* mine and the ones following.

I understand that passing environmental protection legislation has its major challenges, but I implore you to understand that *nothing else will matter* if we do not have a habitable planet due to climate change, the global insect collapse, soil and water pollution, etc.

The current bill(s) that I urge you to support today is/are:

(HB 2824)
so that recesses at school will be way longer and
for it to be illegal to pollute!

Thank you for all of the time and hard work that you do for the people you represent, including Oregon's youth, and please let me know if I can be of future assistance to you with these things.

If you are already in favor of passing immediate environmental protection legislation including the bill(s) mentioned above, I thank you.

I wish you the best in your endeavors to make the world a better place!

With much sincerity, compassion, and urgency,

Amaya Woolley, Age 8

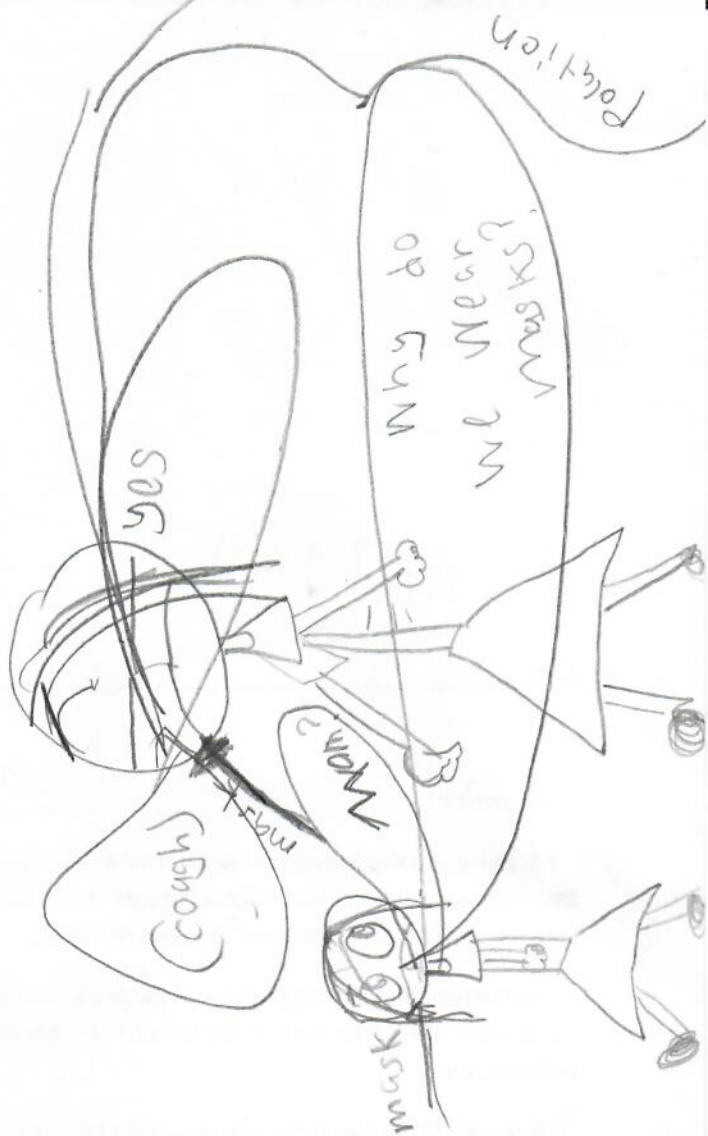

P.S. REP Paul Evans
