

Dear Committee of HB 2824

Thank you for working on the "House  
Bill 2824"

First we all need to think about  
The bugs and Critters that ~~will~~ die because  
of air pollution, our Plants <sup>and</sup> trees also will die  
and we won't be able to breath ~~the~~  
Well either. Most people think that that  
our future will be high ~~the~~ and fly cars,  
but I imagine that it will be beautiful  
and pretty meadows as far as the ~~eyes~~ can see,  
and the beaches with out trash in them,  
Please write back to discuss on more ideas  
~~to~~ help Earth.
