

Dear Committee of HB 2824

I want to get clean energy jobs because when the air is dirty people will get sick. Earth will get damaged and many years later, earth won't have a lot of living things on it.

The insects are dying and when I get older I want to see the ladybugs and butterflies and other bugs and also because they help the plants grow and we need plants to breathe.

Thank you for reading my letter, and I hope you agree with me and help our plants and insects

from, Janelle M. Haupt
