

SB 580 STAFF MEASURE SUMMARY

House Committee On Natural Resources

Prepared By: Kailey Kornhauser, LPRO Analyst

Meeting Dates: 4/11

WHAT THE MEASURE DOES:

Prohibits use of an M44 cyanide device, cyanide trap, cyanide gun, or similar device used to propel dose of sodium cyanide into an animal for purpose of taking animal.

FISCAL: No fiscal impact

REVENUE: No revenue impact

SENATE VOTE: Ayes, 25; Nays, 3--Girod, Linthicum, Thomsen; Excused, 2--Baertschiger JR, Boquist.

ISSUES DISCUSSED:

EFFECT OF AMENDMENT:

No amendment.

BACKGROUND:

Sodium cyanide ejectors have been used in various forms to manage predator damage since the 1930s. The M44 is a spring-powered device that is staked into the ground, baited, and designed to prompt a "bite and pull" response from the animal. When activated, sodium cyanide powder is ejected upward into the mouth of the animal, resulting in the animal's death.

Senate Bill 580 would prohibit the use of a cyanide device designed to propel a dose of sodium cyanide into an animal for the purpose of taking the animal.
