To: Joint Committee on Ways and Means Subcommittee on General Government;
Senator: Thatcher; **Representatives:** Noble; Post; [and many others].

Re: I DO NOT SUPPORT [SB 5517]. Data should have been posted earlier for citizen review.

[SB 5517] is a collection of presentations and budgets that are not for the faint hearted.

My main concern is the vast number of documents contained in the [Meeting Materials / Exhibits] presented by Legislative Agencies that appear to have been posted within the past two (2) days.

From a citizen's point of view, reviewing and analyzing the data contained in the aforementioned documents are simply too vast to be comprehended thoroughly in two days.

The presentation of all of these documents in the manner so described can be compared to the number of illegal aliens pouring over our borders. And maybe that is the intent in doing so since Oregon practices sedition as an openly "Sanctuary State."

I would recommend that "timeliness" be included in the Key Performance Measures. Also, has anyone calculated the cost to the taxpayers for every agency having this statistical garbage of KPMs?

I would also recommend that "Limited Funds and Unlimited Funds" should be identified.

I would recommend the "Debt Service" should also be identified.

My last question for today, "Are State employees compelled to pay into the Pension Obligation Bond?"

Today's Agenda with the accompanying tons of data is sure to put the most harden and committed insomniac to sleep. Those that are left awake will probably never ever look at this sector of the budget again-which also might be the intent of the Legislative Agencies.

Regardless, have a good meeting.

Respectfully submitted,
/s/ David S. Wall
