**Date:** Friday, April 12, 2019 9:51:03 AM

---

Dear Joint Committee on Student success,

So much of the classroom environment is fight or flight - overflowing with desks, an inability to mold to an individual need or even purchase basic supplies has created a toxic environment.

An environment that is churning out kids incapable of being productive in this rapidly changing world. We have some incredibly talented teachers and an abundance of deserving students. It is time we step up and show this country that Oregon puts our next generation first.

Sincerely,

Deonna Larson
