Subject: April 11 Hearing - Supportive testimony for HB 2019
Date: Friday, April 12, 2019 9:50:31 AM

Dear Joint Committee on Student success,

With 4 kids in public schools and having volunteered hours and hours of my own time I know the struggles of our Oregon school systems operation on a budget I'll equipped to create vibrant learners and successful students. I see how hard the teachers and kids work with barely anything. I do what I can at school to help teachers and kids seeing the stress and difficult choices they make. They have been without safe drinking water, enough teachers, enough resources to provide the best learning environment. Our children are our future. They will be the scientists that find a way for us to survive in ever worsening environmental conditions. They will be the politicians that find a way for us to live in peace with other struggling countries as resources become more scarce. They will be the doctors who find a cure for cancer. They will be the teachers, caregivers and IT engineers that make our world work. We all want healthy and happy kids with every opportunity to be the world's best. Thank you for funding our future.

Sincerely,
Mary Cadien
