Subject: April 11 Hearing - Supportive testimony for HB 2019
Date: Friday, April 12, 2019 9:48:23 AM

Dear Joint Committee on Student success,

I support our state making new investments in Oregon students...we need more physical education, art, more recess and play time to use their imaginations, more access to mental health care, as well as occupational therapy/speech therapy. Older kids need more vocational prep and life skills/personal finance skills. Our kids deserve smaller classes and teacher's need to not dip into their own salary to pay for books and supplies. They are juggling large class sizes with so many children and some with special needs. We need diversity training/education too, especially in our current race/immigrant social climate. We need more funding so we don't fail this new generation in Oregon.

Sincerely,
Amy Siadal
