Hello Committee Members,

Please, vote “yes” on HB 2682. This seems to be common sense that a bike lane proceeds through an intersection, yet at least one court seems to have ruled that it doesn’t. Bicyclists need protection to ensure drivers will take a second look when turning. I commute to work most days and am very aware of possible collisions at intersections due to driver inattention. Drivers should be held accountable for injuring or killing cyclists when crossing the unmarked bike lane that extends through the intersection.

Thank you,
Rebecca Clark
