---

Hi,

I am writing to you as a 25 year veteran educator in Oregon. I was hired when Measure 5 passed and Portland Schools let go of 15 social workers and hired 15 of us school psychologists to get more “bang for their buck”. Funding education has not been the same since.

We need to treat educating our youth as an investment. An investment in folks wanting to move here and increase the property value, make Oregon a more desirable place to raise kids and most importantly to educate our children to become happy, productive, knowledgeable adults as they enter the work force.

I am excited about your proposal to ask businesses to help pay for education as it will be good for business AND best for kids.

Sincerely,  
Amy Henning  
Beaverton Schools.
