

I am writing this letter in opposition of HB2015

The voters of the State Of Oregon overwhelming voted this idea down 5 years ago FACT

With this bill it would give undocumented immigrants able to automatically be eligible to be signed up to vote with the motor voter law .FACT

I know this because I know a few people that are not citizens of the U.S.A that receive ballots FACT.

The legislatures should do their homework on who can legally vote and follow the law and obey it.

The legislatures also should listen to voters and respect their decisions and not push your personal agenda onto the voters Fact.

I am tired of being treated like a second class citizen. The government takes my money and gives it to undocumented Immigrants Via free education, health care, housing, snap cards, etc. FACT

What does the responsible voters get? The threat of losing our property and jail time if we don't obey the all mighty government. Fact

Why is this bill being pushed with the emergency clause? It doesn't go into effect till year 2021

I have my own suspicions. I can guarantee I will not hear from any one of you legislatures because you choose not to listen or debate issues with your constituents. Prove me wrong

In closing go home and ask yourself where does charity begin? I can tell you charity starts at home, not the government.
