

I wanted to write to express my STRONG support for increased investment in K-12 education in Oregon and for house bill 3427. I firmly believe that investments in education are critical to a healthy and thriving future society and are one of the smartest long-term choices for our public funds. Education is a path out of poverty and every dollar that we invest in our children now will pay off many times over in future in savings and improved outcomes.

Regards,
Barbara Dusicka
