

Hello Mr. / Mrs. Oregon Politician,

I apologize for the generalized greeting, but I don't have any real clue who receives these emails. My name is Nathan C., and I am currently a sophomore at Health and Science School doing a civic action project.

On to my point, I believe that Senate Bill 420 should pass because it has a clear purpose with a plan on what to do about the problem of people's past marijuana convictions that fall under the current legal definitions of sale / use / possession. I am in agreement with the current truthful takeaway that cannabis use by legal adults is unable to be compared to the use of heroin which is deserving of its Schedule I rating.

I don't know how to end this, so please don't think me any less for using a ramshackle excuse as a conclusion.
