

Chair Hovey and Members of the Committee:

My name is Christine Perala Gardiner. I'm a farmer and seed producer in Josephine County, Cave Junction. I ask your support for HB 2882, as the new era of corporate accountability needs to arrive in Oregon ASAP.

I support legislation to regulate GE crops in Oregon, although the damage already caused by these genetic mutants has already cost farmers, Oregonians and the American People billions of dollars. It's not too late to regulate these toxic crops.

Please stand up for the family farmers and the eating public of Oregon, and vote to pass HB 2882 out of committee with your support.

Thank you for allowing me to participate in Oregon representative government, and thank you for your service to our state.
