

Dear Oregon House Committee on Rules,

Chair Representative Paul Holvey,
Vice Chair House Democratic Leader Jennifer Williamson
Vice Chair House Republican Leader Carl Wilson
Member Representative Denyc Boles
Member Representative Rob Nosse
Member Representative Barbara Smith Warner
Member Representative Sherrie Sprenger

I strongly support HB 2882, relating to liability for contamination by genetically engineered organisms. Contamination by genetically engineered organisms causes a great deal of economic damage. Scientific research at Oregon State University & others have documented the danger of cross breeding with local flora causing contamination by the genetically engineered organisms. This occurrence causes an impact of financial damages to be compensated.

Thank you for your full support of the importance of HB 2882. Liability, compensation & legal justice from contamination caused by genetically engineered organisms in Oregon. Which is long over due by Oregon Legislators.

Sincerely,

Cyndi Karp
