I'm Josh Maurice, a resident of the Hazelnut Grove tiny home village in Portland. I'd like to voice my support for tiny home villages as a solution for our homeless and underhoused populations. Villages provide the ability to live & participate constructively in a caring community (meaning both the village itself and the wider community). They help connect people with education, housing, work, etc. We're pioneering a participatory paradigm of open-heartedness, open-mindedness, self-governance, voluntarism, etc. We invite anyone who's interested to come visit, and we strongly urge you to help facilitate the creation of many more villages. Thanks!
