---

I will have to work until I am 67 years old to retire as it is. If this bill passes, it will add at least another 5-6 years to my retirement. The amazing part of this? In my family, only 1 person has made it over 58 years old.

How can the State, Federal Government continually take what we the employees have paid into for our entire careers? What right do you have to take what has been promised to us? We have given you every single ounce of our being, and yet you keep taking.

12.5% is a huge amount, we will already lose 35% for taxes -add the 12.5%. 47.5%= Almost half of what we have sweated and and worked so hard for.

You should be ashamed of yourselves for even allowing this bill to get this far. This has convinced me to stop voting at all, what is the point?
