

## HB 2619 A -A3 STAFF MEASURE SUMMARY

### House Committee On Rules

---

**Prepared By:** Josh Nasbe, Counsel

**Meeting Dates:** 5/8, 5/15

---

#### **WHAT THE MEASURE DOES:**

Prohibits the sale, purchase, or use of a pesticide containing chlorpyrifos in the state of Oregon.

#### **ISSUES DISCUSSED:**

#### **EFFECT OF AMENDMENT:**

-A3 Applies provisions of bill to sale, purchase or use of pesticide products on or after January 1, 2021.

#### **BACKGROUND:**

Chlorpyrifos is an organophosphate insecticide used to control a variety of pests, including termites, mosquitos, and roundworms. All pesticides sold or distributed in the U.S. must be registered with the U.S. Environmental Protection Agency (EPA), which involves an evaluation of the human health and other risks attributable to the chemicals that make up the pesticide, identification of proper usage, and labeling to ensure the pesticide will not have unreasonable adverse effects on humans or the environment.

Findings from a 2014 human health and risk assessment of chlorpyrifos led the EPA to issue a proposed rule to revoke all tolerances of chlorpyrifos, indicating that no amount of chlorpyrifos residue on foods would be considered acceptable. Based on public comment regarding the proposed rule, a revised human health and risk assessment was conducted and was published by the EPA in November 2016. The 2016 assessment identified risks from dietary exposure as a result of ingesting residues of chlorpyrifos on food crops and risks from drinking water. Other findings included wildlife mortality associated with chlorpyrifos use on residential lawns, termite abatement, and application on golf courses. Currently, chlorpyrifos remains a registered pesticide; however the EPA continues to consider a tolerance revocation, which would require all agricultural uses of chlorpyrifos cease.

House Bill 2619 would prohibit the sale, offer of sale, purchase, or use in the state of any pesticide product containing chlorpyrifos.
