

Please fix this bill or vote against it.

My biggest concern is two fold:

Guns will be confiscated under this bill. No determination is provided for another person in the household to protect themselves with a weapon. How will you provide for that scenario?

Secondly, after the hold on the firearms and ammunition is released, how do you determine the person who you took the firearms from was at the time the owner or approved possessor of same? If it was not determined at the outset, there is no way to prove it when the firearms are approved to be returned?

Please fix the bill to protect innocent parties here and their rights.
