Subject: Support for HB 2469

May 15, 2019

Honorable Senators,

As an urban resident who cares about Statewide Planning Goals, including Goals 3, 4 and 5, I urge you to support HB 2469.

It's a sensible and reasonable bill that will help farmers and not at all diminish our custodianship of Oregon's environment and natural resources.

This bill is the type of thoughtful, responsible measures the Legislature should be promoting. In contrast, HB 2001 and SB 10 are absurd and harmful measures that serve no interests other than greedy developers and YIMBY zealots.
