

Greetings

I feel that I should have just maintained living under a rock and not getting involved in politics. I am shocked and appalled by how I see bills going into the process of being reviewed and voted on.

I was a homeschooling mom for several years until we decided as a family to put the kids in school. My favorite section of school? Government. I remember crying when I talked of how exciting it is to see something you want or something you believe in go through a process.

Now. It's different. This viewing of how the process goes is daunting for so many people. I believe now you are trying to create a process that will be even worse for Oregonian's. What is happening to us?

With this bill you are removing people that can't afford computers, printers and have internet. This can be the elderly, single mothers, single fathers and college students. You are making it so only a certain group of people you want to hear from can speak and you are yet again segregating against those that don't have the ability to have these items. Why would you want to do this act to your Oregonian's? To the people that take the time to go and vote for you?

SB 761-3 should not exist and it shouldn't even be brought to the floor let alone go to Committee.

Thank you
Li Andra Johnson
