OREGON HEALTH AUTHORITY
Oregon State Hospital

Strategies for managing Aid & Assist orders

- Assessment and treatment strategies for efficient and effective treatment while maintaining the median length of stay
- Two additional certified evaluators in Forensic Evaluation
- Increased capacity from 132 beds in 2013 to 236 in October 2018
- Provide ongoing training and consultation with District Attorneys, defense attorneys, judges, jail commanders, and other community partners regarding options and laws applicable to defendants with mental illness
- OHA and OSH have been working with community partners to address the state-wide need for alternative services in the community behavioral health system

SB 24 Aid and Assist Fixes

- Requires community mental health program communication and consultation for misdemeanors and municipal violations.
- Requires community treatment for municipal and misdemeanor defendants unless a certified evaluator or the CMHP determines that the defendant needs a hospital level of care due to their dangerousness and the acuity of their symptoms, or if the court makes specific findings.
- Clarifies language related to .365 evaluations.
