*Two OIA facilities that are counted as having completed OIA still have years remaining, but are not expected to resume use.

**Completed does not include local disqualifications, only those concluding full 3–5-year period. Proposed is based on local authorizations that are outstanding and unused as of December 31, 2019, many of which will begin standard enterprise zone exemptions in 2019, and quite a few of which will never be used. Business Oregon has received around 20 such authorizations from local zone managers/sponsors so far in 2019
