

Dear Senate Rules Committee,

I am writing to urge you to decline to pass SB 1050. This bill is bad for our farmers and foresters because it opens them up for development of non farm and forest related dwellings. This bill would also erode Measure 49, a measure that had wide spread support. Making this major change with little notice and next to no opportunity for public input erodes at the trust we put into our systems of policy making.

sincerely,  
Katy
