BACKGROUND:

ORS 570.755 defines "invasive species" to mean "nonnative organisms that cause economic or environmental harm and are capable of spreading to new areas of the state. 'Invasive species' does not include humans, domestic livestock or nonharmful exotic organisms." The 2001 Oregon Legislative Assembly established the Oregon Invasive Species Council (Council) to conduct a comprehensive and coordinated effort to prevent, detect, control, and eliminate invasive species harming the region's economy, health, and natural resources. The responsibilities of the Council include maintaining an invasive species reporting hotline, educating the public about invasive species, developing a statewide plan for invasive species, and providing a grant or loan program for eradication of invasive species.

Senate Bill 445 would require the Council to submit a biennial report to the Legislative Assembly and revise the Council membership.
