

I am appalled that Rep Smith wants to allow coyotes to continue to be killed in these horrible, cruel, inhumane murderous killing contest. I cannot believe I live in a state that thinks it is ok to have killing contests of wildlife. I am angry that this horrible man is even proposing to allow these cruel so-called contests to keep on killing coyotes. Coyotes are incredibly important to the ecological balance by killing the rodents and rabbits that would take over if there weren't coyote's to eat them. Obviously, Rep. Smith and those who like to murder the coyote for please are too stupid to understand how nature works! Besides the fact that it has been proven in studies, that when coyote populations are disrupted by random killings, more pups are born and more coyote's from other areas move into the disrupted territory. Of course, if Rep Smith and the people who murder wildlife for fun are too stupid to understand the dynamics of the balance of nature, they are for sure too stupid to comprehend this!!!

Other states have banned these senseless, cruel murder fests and I am counting on my state to ban them as well and to eliminate Rep Smiths horrible amendment!!! I am following this closely as are many people in other states to see if Oregon will follow their example or if Oregon is just another loser state who goes along with cruelty to wildlife!
