To: Joint Committee on Ways and Means Subcommittee on Transportation and Economic Development;
[and many others].

Re: I DO NOT SUPPORT: [HB 2001A]

[HB 2001A] is an attempt to make "Housing" an "entitlement."

There is not enough money and or land to house everyone in Oregon. That is why we have California.

The "Demand" for local governments to increase "Affordable Housing" and to participate in a mandated Housing inventory scheme is objectionable. The cost alone should "kill" **[HB 2001A]**.

"Estimating Housing" predicated upon "Population predictions" is as accurate as predicting your re-election chances by interpreting the position of dried chicken-bones thrown from a dice-cup.

If you Legislators are going to make any meaningful attempts at placing "Housing" where it belongs-on the "Market Place" and "individual responsibility" you must first "outlaw" legislation tendered by Politicians like Rep. Kotex from turning the public's treasury into the public trough.

[\$3,000,000] out of the General Fund for this project? "Hell No!"

Check out **[SB 5445]**. You are paying [\$4,334,048] just to service the debt incurred by the "Small-Scale Energy Loan Program" and an additional [\$3,023,370] to service the debt for "Sustainable Technology Programs and for the Public Schools Grant Program."

VOTE "NO" ON [HB 2001A]!

Respectfully submitted,

/s/ David S. Wall
