

SUBCOMMITTEE RECOMMENDATION

HB 2206

Relating to emergency management

HB 2206 directs the State Fire Marshal to develop and administer a statewide program to evaluate the condition of buildings after an emergency and determine whether the buildings may be safely occupied. The measure directs the State Fire Marshal to implement a statewide system for the registration of, and communication with, local program coordinators, certified building evaluators, and approved trainers. The bill also allows local governments to enter into agreements with private contractors to conduct building occupancy safety inspections following an emergency.

The Public Safety Subcommittee recommends HB 2206 be reported out do pass.
