

Greetings,

I just wanted to take a moment and tell you how much I support Senate Bill 998. I am a daily year round bike commuter who is excited that what I do on my daily bike ride will no longer be illegal. Losing momentum on a bike is something I naturally try to avoid if I can because 1) it is hard to gain back and 2) I am more maneuverable when I have some momentum (aka safer).

When no one is around and there is not a question of right away, I travel through stop signs without stopping, this bill allows me to do so legally. HOWEVER, if there is a question of right a way with a car or a pedestrian, I stop now and will still stop under SB998. This is great, this is how it should be. There is not going to be chaos and pandemonium if this passes, it will just be a natural extension of what the vast majority of bike riders do already and for that I thank you.

Please support SB998

Yours,

Kevin Coughlin
