

Please pass Senate Bill 998, it's the best for active transportation in our state.

Why does everyone from spandex wearing to little old ladies roll stop signs already? Because it simply makes sense for the mode of transport. Cyclists are working for their momentum and take on the risk for yielding; so they naturally slow and only proceed when clear. This is simply the law catching up with reality. Please lets finally catch up with the Idaho Stop Law that passed in the 80s and make cycling in Oregon better.

Regards,

Ben Guernsey
