

I support Senate Bill 998!

Thank you for working on this bill!

I am a resident of NE Portland and I commute to work on bike as well as run errands and other things.

The way this bill is written ensures that cyclists come to a stop at stop signs when other users are present but can treat these same signs as yields if no one is around. This happens quite a lot in neighborhoods and it would be wonderful to know that after confirming the intersection is empty I can safely move through without coming to a full stop.

Please pass this bill and help us keep our momentum when it's safe to do so!

Thank you!

Jason Britton
