

Please register my support for SB998. It is a necessary bill to facilitate cycling in cities without any cost to safety. It helps all traffic move smoother. It legalizes common cycling behavior of safe, cautious cyclists who should not be at risk of violations and fines for sensible actions that benefit all urban residents.

We all benefit from an Oregon where more people cycle and fewer drive for urban trips. This bill removes an impediment to cycling and is a step in the direction of a better transportation system.

thank you,
