

Dear Committee on Education

I'm a resident on [REDACTED] and a member of the health care community, acting as a [REDACTED]. It was recently brought to my attention there was a bill to be voted on tomorrow regarding wifi in schools and mandates to protect our children from excess exposure. I'm asking that you vote, yes, in support of the long-overdue bill to protect the most vulnerable segment of the population against the growing exposure to non-ionizing radiation via wifi and the negative health effects this causes long-term, in schools.

Please and thank you, Priscilla [REDACTED]
