Subject: Testimony against House Bill 3063
Date: Thursday, February 28, 2019 3:23:57 PM

My name is [REDACTED] and I live in [REDACTED]. I cannot protest this Bill enough! I grew my son for 10 months in my body. Took him everywhere I went. Gave a very painful birth to bring him into this world. I am the one who is up with him in the middle of the night when he can't sleep or he's sick. If he hurts himself I comfort him. When he's scared I sleep next to him. I DO NOT think it is right for my rights as a parent to be taken away from me. If I decide not to vaccinate my son then that should be MY right as his parent. If vaccines work so well then why would people be so afraid of un-vaccinated children? Vaccinated children should be safe, correct? This is not an email to slam vaccinations or the choice people make to vaccinate their children. But for those of us who choose not to vaccinate I think we should be allowed that right. Please don't take that from me or anyone else.

I myself have personally witnessed 3 vaccinations gone horribly wrong! People can tell me all they want that vaccines are safe. But I have done the research on both sides. I see the REAL statistics and I have seen the outcome of a bad reaction to vaccines. People are all different. You cannot expect each person to react the exact same to every vaccine. It would be absurd to think nothing bad could come of vaccinations. And I personally am not willing to take my chances. Again, I beg you to please not take my rights away from me as a parent. Let me decide what is best for MY child.

Thank you for your time and consideration.

Sincerely,

[REDACTED]
