

Small businesses support the Student Success Act

Oregon small businesses are part of the fabric of our communities. And when Oregon students have the tools that they need to succeed, our communities and our small businesses can thrive. That's why *we support the Student Success Act*, which would make a modest change to our business tax structure so we can invest \$2 billion in Oregon students.

These investments would be game-changing — lowering class sizes, restoring vocational prep, art, music, and PE, increasing early education access, and adding mental health resources. *The Student Success Act will better prepare students to enter the workforce and help more families to participate in our economy.*

We are proud to support the Student Success Act because strong schools are the foundation of strong communities.
