

## HB 2205 A STAFF MEASURE SUMMARY

### House Committee On Veterans and Emergency Preparedness

---

**Action Date:** 04/04/19

**Action:** Do pass with amendments and be referred to Ways and Means. (Printed A-Eng.)

**Vote:** 8-0-0-0

**Yeas:** 8 - Evans, Findley, Lewis, Meek, Neron, Wallan, Wilde, Zika

**Fiscal:** Fiscal impact issued

**Revenue:** Revenue impact issued

**Prepared By:** Patrick Brennan, LPRO Analyst

**Meeting Dates:** 3/14, 3/26, 4/4

---

#### WHAT THE MEASURE DOES:

Provides \$15 million in Article XI-Q bond proceeds for Lend-Lease/SPIRE program. Directs State Aviation Board to develop list of preparedness equipment needed throughout the state to respond to local and regional emergencies. Directs Department of Aviation to develop and administer a grant program to distribute preparedness equipment or funds to purchase equipment. Specifies that Public Contracting Code does not apply to provisions of measure in emergency situations. Directs Department to report to Legislative Assembly and State Board of Aviation on program. Establishes the Aviation Resiliency Fund. Declares emergency, effective on passage.

#### ISSUES DISCUSSED:

- Background on the SPIRE program
- Effect of amendments
- Not intended to pay for runways at airports

#### EFFECT OF AMENDMENT:

Replaces original measure.

#### BACKGROUND:

The coast of the Pacific Northwest has, for thousands of years, experienced periodic, catastrophic seismic events related to the Cascadia subduction zone (CSZ), which extends from northern California to British Columbia. However, it was not until the 1980s when scientists recognized the CSZ as an active fault that poses a major threat to Oregon. Since then, building codes have been updated, and state and regional preparations have been undertaken to prepare Oregon citizens and the state's infrastructure and governments to better sustain an earthquake, and also to recover following such an event.

The Oregon Seismic Safety Policy Advisory Committee (OSSPAC) defines the goal of seismic resilience as follows: Oregon citizens will not only be protected from life-threatening physical harm, but because of the risk reduction measures and pre-disaster planning, communities will be able to recover more quickly and with less continuing vulnerability following a Cascadia subduction zone earthquake and tsunami.
