BACKGROUND:

The Oregon Department of Agriculture operates a Weights and Measures Program to ensure equity and standardization in commercial transactions for approximately 13,000 Oregon businesses statewide. The program provides testing services for weighing and measuring devices, and investigates and responds to complaints of discrepancies in weighing and measuring devices. Common weighing and measuring devices include retail grocery store scales, gas pumps, fuel meters, wholesale fuel meters, commercial vehicle scales, livestock scales, and industrial scales.

The program is funded solely from license fees for commercial weighing and measuring equipment. ORS 618.141 outlines maximum license fees for these instruments and devices. The current fee caps were established by the Legislature in 2007, and have not been modified since establishment.

The measure would increase maximum license fees for commercial weighing or measuring devices and limit the rate of fee increase to three percent per year during licensing periods beginning before July 1, 2026.
