A-Bill for an Act

Relating to voluntary stream restoration; creating new provisions; amending ORS 196.905 and 509.585; and declaring an emergency.

Be it enacted by the People of the State of Oregon:

SECTION 1. Sections 2 and 3 of this 2019 Act are added to and made a part of the wildlife laws.

SECTION 2. The Legislative Assembly finds and declares that:

1. Many small streams in eastern Oregon were historically inhabited by beaver populations and strongly influenced by beavers’ unique ability to modify their physical surroundings. Beaver dams had the effect of slowing the flow of water, allowing for natural overflow onto surrounding ancient floodplains and providing many positive benefits to stream ecosystems and to the hydrologic functioning of streams and adjacent water tables.

2. Due, in part, to the near eradication of the once-prevalent beaver populations, many stream systems have become severely degraded during the past century, developing deeply eroded and incised stream channels that have lost connectivity with the natural ancient floodplain. These changes to the stream systems have resulted in adverse environmental and economic impacts.

3. The public policy of the State of Oregon is to encourage and support a program for voluntary stream restoration actions by landowners that can help restore both environmental and economic health to eastern Oregon through the construction of environmental restoration weirs.

4. Environmental restoration weirs constructed pursuant to section 3 of this 2019 Act

NOTE: Matter in **boldfaced** type in an amended section is new; matter [*italic and bracketed*] is existing law to be omitted.

New sections are in **boldfaced** type.

LC 1802
are substantially similar in nature, do not result in long-term harm to water resources of this state and provide co-benefits to stream restoration that include:

(a) Improving habitat conditions;
(b) Slowing stream runoff;
(c) Decreasing the chance of catastrophic wildfire;
(d) Improving carbon sequestration; and
(e) Improving economic productivity of the adjacent ancient floodplain.

SECTION 3. (1) As used in this section and section 2 of this 2019 Act:
(a) “Ancient floodplain” means channel-adjacent areas and surfaces constructed by fluvial processes that functioned as floodplains or areas for overbank deposition prior to channel incision.
(b) “Environmental restoration weir” means one or more structures constructed for the purpose of delaying or slowing, but not preventing, water flow, in order to raise the water table and water surface elevations within incised or eroded streams up to or near the level of the ancient floodplain, and to promote restoration of stream and habitat conditions.
(c) “Healthy salmonid population” means a population of salmonids that, as determined by the State Department of Fish and Wildlife:
(A) Demonstrates appropriate life stages throughout the year;
(B) Reproduces at sufficient levels to be a self-sustaining population into the foreseeable future; and
(C) May be sufficiently abundant to be subject to harvest.
(d) “Incised or eroded stream” means a stream that has been scoured by erosion to the extent that the channel bed elevation has lowered relative to its ancient floodplain and the stream has lost connectivity with the ancient floodplain, as characterized by:
(A) The loss of natural wetland, riparian or meadow conditions in the adjacent surfaces;
(B) The absence of overbank flooding or deposition;
(C) The loss of diversity of fish or other species; or
(D) The presence of invasive dry land species that have encroached from adjacent uplands, including but not limited to sagebrush, bunch grass, juniper and pine.
(e) “Qualifying stream” means an incised or eroded stream, a designated reach of an incised or eroded stream or a designated set of adjacent reaches of an incised or eroded stream that, prior to commencement of a project authorized pursuant to subsection (2) of this section:
(A) Has an average stream flow of less than three cubic feet per second during at least two months of each year;
(B) Has not had a healthy salmonid population for at least three years; and
(C) Is incised or eroded to the extent that either:
(i) The channel bed elevation has lowered by two feet or more relative to the elevation of the ancient floodplain; or
(ii) The ancient floodplain has been scoured out to a rocky bottom.
(f) “Reach” means a section of a stream that is similar in flow topography and habitat characteristics and is between 50 and 500 feet in length.
(g) “Summit of the Cascade Mountains” has the meaning given that term in ORS 321.805.
(2) The State Department of Fish and Wildlife shall adopt by rule and administer a program for authorizing voluntary projects for stream restoration and habitat improvement
by the construction of environmental restoration weirs. The department may only au-

thorize a project under the program if the project involves construction of environmental

restoration weirs on one or more qualifying streams located in any closed basin:

(a) From which water does not flow to the Pacific Ocean; and

(b) That is located east of the summit of the Cascade Mountains.

(3) Rules adopted under subsection (2) of this section shall identify criteria for evaluating

voluntary projects undertaken pursuant to the program.

(4) For a period of up to ten years after construction of the environmental restoration

weirs is complete, the department:

(a) Shall require the person that engaged in an authorized voluntary project to maintain

the environmental restoration weirs for their stream restoration and habitat improvement

values;

(b) May require the person to engage in photo monitoring of the environmental restora-

tion weirs; and

(c) Shall, in coordination with the Water Resources Department, require the person to

modify the environmental restoration weir if the environmental restoration weir is found by

the Water Resources Department to be resulting in injury to an existing water right.

(5) A person's total costs for meeting requirements for a voluntary project to be au-

thorized under the program may not exceed five percent of the total cost of constructing the

environmental restoration weirs.

(6)(a) Except as provided under paragraph (b) of this subsection, a voluntary restoration

project that is authorized by the State Department of Fish and Wildlife pursuant to the

program is exempt from fish passage requirements under ORS 509.585.

(b)(A) A person engaging in a voluntary project authorized under the program shall work

collaboratively with the department to provide appropriate fish passage for salmonid on a

qualifying stream if:

(i) A healthy salmonid population will likely develop in the qualifying stream as a result

of the voluntary restoration project; and

(ii) The healthy salmonid population will only return if appropriate fish passage is in-

cluded in the voluntary restoration project.

(B) The department may only require construction of appropriate fish passage under this

paragraph subject to available funding for the construction in the Fish Passage Fund estab-

lished under ORS 497.139 and as provided by the person engaging in the voluntary project.
The total direct costs to a person engaging in the voluntary project, not including funding

provided from the Fish Passage Fund, for constructing required appropriate fish passage as

part of the voluntary project may not exceed 10 percent of the total cost of constructing the

environmental restoration weirs.

(7) Planting or removal of brush and trees from stream banks and riparian areas as part

of a voluntary project authorized under subsection (2) of this section are not subject to

riparian management requirements established under the Oregon Forest Practices Act.

(8) A permit is not required under ORS 537.130 for water that is delayed or slowed behind

an environmental restoration weir.
permits or certificates have been or shall be issued under ORS chapter 537 or 539 and for which
preliminary permits or licenses have been or shall be issued under ORS 543.010 to 543.610.

(2) Nothing in ORS 196.600 to 196.905 applies to removal of materials from the beds or banks
or filling of the waters of a nonnavigable natural waterway, or any portion thereof, in this state, if:
   (a) Such waterway or portion is situated within forestland; and
   (b) Such removal or filling is directly connected with a forest management practice conducted
in accordance with ORS 527.610 to 527.770, 527.990 and 527.992.

(3) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, on converted
wetlands for normal farming and ranching activities such as plowing, grazing, seeding, planting,
cultivating, conventional crop rotation or harvesting.

(4) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, on lands zoned for
exclusive farm use as described in ORS 215.203 for the following activities:
   (a) Drainage or maintenance of farm or stock ponds; or
   (b) Maintenance of farm roads in such a manner as to not significantly adversely affect wetlands
or any other waters of this state.

(5) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for subsurface
 drainage by deep ripping, tiling or moling on converted wetlands that are zoned for exclusive farm
use pursuant to ORS 215.203.

(6) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for any activity
defined as a farm use in ORS 215.203, on lands zoned for exclusive farm use pursuant to ORS
215.203, if the lands are converted wetlands that are also certified as prior converted cropland by
the Natural Resources Conservation Service of the United States Department of Agriculture, or its
successor agency, so long as commercial agricultural production on the land has not been aban-
donned for five or more years.

(7) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for the reestablish-
ment of crops under federal conservation reserve program provisions set forth in 16 U.S.C. 3831 as
in effect on January 1, 2010.

(8) The exemptions in subsections (3) to (7) of this section do not apply to any fill or removal
that involves changing an area of wetlands to a nonfarm use.

(9) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for the maintenance
or reconstruction of structures such as dikes, dams, levees, groins, riprap, tidegates, drainage
ditches, irrigation ditches and tile drain systems, provided that:
   (a) The structure was serviceable within the past five years; and
   (b) Such maintenance or reconstruction would not significantly adversely affect wetlands or
other waters of this state to a greater extent than the wetlands or waters of this state were affected
as a result of the original construction of those structures.

(10) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for maintenance,
including emergency reconstruction of recently damaged parts, of currently serviceable roads or
transportation structures such as groins and riprap protecting roads, causeways and bridge abut-
ments or approaches.

(11) Nothing in ORS 196.600 to 196.905 applies to removal or filling, or both, within the beds or
banks of any waters of this state conducted as part of a surface mining operation, that is the subject
of a memorandum of agreement between the Department of State Lands and the State Department
of Geology and Mineral Industries in which the State Department of Geology and Mineral Industries
is assigned sole responsibility for permitting as described in ORS 517.797.
(12) The Department of State Lands may adopt a rule that exempts from the requirement to obtain a permit under ORS 196.800 to 196.900 voluntary habitat restoration projects that have only minimal adverse impact on waters of this state.

(13) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for a change in the point of diversion to withdraw surface water for beneficial use if the change in the point of diversion is necessitated by a change in the location of the surface water and authorized by the Water Resources Department.

(14) Unless otherwise provided in a proposed order or in a final order issued in a contested case, nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, originally intended or subsequently used for the establishment, repair, restoration, resumption or replacement of the following uses, if the use was established on or before January 1, 2017, on lands zoned for exclusive farm use, forest use or mixed farm and forest use:

(a) A dwelling:
   (A) Described in ORS 215.213 (1) or (3) or 215.283 (1);
   (B) Established subject to county approval under ORS 215.402 to 215.438; or
   (C) Lawfully established on or before December 31, 1973;

(b) An agricultural building as defined in ORS 455.315; or

(c) Activities that:
   (A) Are associated with a dwelling or agricultural building described in this subsection;
   (B) Have received county approval, if necessary, under ORS 215.402 to 215.438; and
   (C) Are located on the same lot or parcel as the dwelling or agricultural building.

(15) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, as part of a voluntary project for stream restoration and habitat improvement authorized by the State Department of Fish and Wildlife under section 3 of this 2019 Act.

[(15) (16)]

As used in this section:

(a) “Converted wetlands” means agriculturally managed wetlands that, on or before June 30, 1989, were brought into commercial agricultural production by diking, draining, leveling, filling or any similar hydrologic manipulation and by removal or manipulation of natural vegetation, and that are managed for commercial agricultural purposes.

(b) “Converted wetlands” does not include any stream, slough, ditched creek, spring, lake or any other waters of this state that are located within or adjacent to a converted wetland area.

(c) “Replacement” means the construction of a new structure that is substantially similar in size, sited in a substantially similar location and constructed in place of a previously existing structure.

ORS 196.905. (1) Notwithstanding the exemptions in subsections (3) to (8) of this section, a permit under ORS 196.600 to 196.905 is required for any fill or removal of material in or from the waters of this state when:

(a) The fill or removal is a part of an activity whose purpose is to bring an area of state waters into a use to which it was not previously subject; and

(b) (A) The flow or circulation of the waters of this state may be impaired; or
   (B) The reach of the waters may be reduced.

(2) Nothing in ORS 196.600 to 196.905 applies to removal of materials from the beds or banks.
or filling of the waters of a nonnavigable natural waterway, or any portion thereof, in this state, if:

(a) Such waterway or portion is situated within forestland; and

(b) Such removal or filling is directly connected with a forest management practice conducted
in accordance with ORS 527.610 to 527.770, 527.990 and 527.992.

3. Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, on converted
wetlands for normal farming and ranching activities such as plowing, grazing, seeding, planting,
cultivating, conventional crop rotation or harvesting.

4. Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, on lands zoned for
exclusive farm use as described in ORS 215.203 for the following activities:

(a) Drainage or maintenance of farm or stock ponds; or

(b) Maintenance of farm roads, provided that:

   (A) The farm roads are constructed and maintained in accordance with construction practices
designed to minimize any adverse effects to the aquatic environment;

   (B) Borrow material for farm road maintenance does not come from waters of this state unless
authorized by the Department of State Lands; and

   (C) Maintenance activities are confined to the scope of construction for the original project.

5. Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for any activity
defined as a farm use in ORS 215.203, on lands zoned for exclusive farm use pursuant to ORS
215.203, if the lands are converted wetlands that are also certified as prior converted cropland by
the Natural Resources Conservation Service of the United States Department of Agriculture, or its
successor agency, so long as commercial agricultural production on the land has not been aban-
doned for five or more years.

6. Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for the reestablish-
ment of crops under federal conservation reserve program provisions set forth in 16 U.S.C. 3831 as
in effect on January 1, 2010.

7. The exemptions in subsections (3) to (6) of this section do not apply to any fill or removal
that involves changing an area of wetlands or converted wetlands to a nonfarm use.

8. Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for the maintenance
or reconstruction of structures such as dikes, dams, levees, groins, riprap, tidegates, drainage
ditches, irrigation ditches and tile drain systems, provided that:

   (a) The structure was serviceable within the past five years; and

   (b) Such maintenance or reconstruction would not significantly adversely affect wetlands or
other waters of this state to a greater extent than the wetlands or waters of this state were affected
as a result of the original construction of those structures.

9. Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for temporary dams
constructed for crop or pasture irrigation purposes that are less than 50 cubic yards, provided the
following conditions are satisfied:

   (a) The removal or filling is conducted during periods that minimize adverse effects to fish and
wildlife in accordance with guidance provided by the State Department of Fish and Wildlife;

   (b) The removal or filling does not jeopardize a threatened or endangered species or adversely
modify or destroy the habitat of a threatened or endangered species listed under federal or state
law; and

   (c) Temporary fills are removed in their entirety and the area is restored to its approximate
original elevation.

10. Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for maintenance,
including emergency reconstruction of recently damaged parts, of currently serviceable roads or
transportation structures such as groins and riprap protecting roads, causeways and bridge abut-
ments or approaches.

(11) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for the maintenance
of access roads constructed to move mining equipment, subject to the following conditions:
(a) The access roads are constructed and maintained in accordance with construction practices
that minimize adverse effects to the aquatic environment;
(b) Borrow material for access road maintenance does not come from waters of this state unless
authorized by the Department of State Lands; and
(c) Maintenance activities are confined to the scope of construction for the original project.

(12) Nothing in ORS 196.600 to 196.905 applies to removal or filling, or both, within the beds or
banks of any waters of this state conducted as part of a surface mining operation that is the subject
of a memorandum of agreement between the Department of State Lands and the State Department
of Geology and Mineral Industries in which the State Department of Geology and Mineral Industries
is assigned sole responsibility for permitting as described in ORS 517.797.

(13) The department may adopt a rule that exempts from the requirement to obtain a permit
under ORS 196.800 to 196.900 voluntary habitat restoration projects that have only minimal adverse
impact on waters of this state.

(14) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, for a change in the
point of diversion to withdraw surface water for beneficial use if the change in the point of diversion
is necessitated by a change in the location of the surface water and authorized by the Water Re-
sources Department.

(15) Unless otherwise provided in a proposed order or in a final order issued in a contested case,
nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, originally intended or sub-
sequently used for the establishment, repair, restoration, resumption or replacement of the following
uses, if the use was established on or before January 1, 2017, on lands zoned for exclusive farm use,
forest use or mixed farm and forest use:
(a) A dwelling:
   (A) Described in ORS 215.213 (1) or (3) or 215.283 (1);
   (B) Established subject to county approval under ORS 215.402 to 215.438; or
   (C) Lawfully established on or before December 31, 1973;
   (b) An agricultural building as defined in ORS 455.315; or
   (c) Activities that:
       (A) Are associated with a dwelling or agricultural building described in this subsection;
       (B) Have received county approval, if necessary, under ORS 215.402 to 215.438; and
       (C) Are located on the same lot or parcel as the dwelling or agricultural building.

(16) Nothing in ORS 196.800 to 196.900 applies to removal or filling, or both, as part of a
voluntary project for stream restoration and habitat improvement authorized by the State
Department of Fish and Wildlife under section 3 of this 2019 Act.

[(16)/(17)] As used in this section:
(a) "Converted wetlands" means agriculturally managed wetlands that, on or before June 30,
1989, were brought into commercial agricultural production by diking, draining, leveling, filling or
any similar hydrologic manipulation and by removal or manipulation of natural vegetation, and that
are managed for commercial agricultural purposes.
   (B) "Converted wetlands" does not include any stream, slough, ditched creek, spring, lake or any
other waters of this state that are located within or adjacent to a converted wetland area.

(b) “Harvesting” means physically removing crops or other agricultural products.

c) “Plowing” includes all forms of primary tillage, including moldboard, chisel or wide-blade plowing, discing, harrowing or similar means of breaking up, cutting, turning over or stirring soil to prepare it for planting crops or other agricultural products. “Plowing” does not include:

(A) The redistribution of soil, rock, sand or other surface materials in a manner that changes areas of waters of this state into dry land; or

(B) Rock crushing activities that result in the loss of natural drainage characteristics, the reduction of water storage and recharge capability, or the overburdening of natural water filtration capacity.

d) “Replacement” means the construction of a new structure that is substantially similar in size, sited in a substantially similar location and constructed in place of a previously existing structure.

e) “Seeding” means the sowing of seed or placement of seedlings to produce crops or other agricultural products.

SECTION 6. ORS 509.585 is amended to read:

509.585. (1) It is the policy of the State of Oregon to provide for upstream and downstream passage for native migratory fish and the Legislative Assembly finds that cooperation and collaboration between public and private entities is necessary to accomplish the policy goal of providing passage for native migratory fish and to achieve the enhancement and restoration of Oregon’s native salmonid populations, as envisioned by the Oregon Plan. Therefore, except as provided in ORS chapter 509, fish passage is required in all waters of this state in which native migratory fish are currently or have historically been present.

(2) Except as otherwise provided by this section or ORS 509.645 or section 3 of this 2019 Act, a person owning or operating an artificial obstruction may not construct or maintain any artificial obstruction across any waters of this state that are inhabited, or historically inhabited, by native migratory fish without providing passage for native migratory fish.

(3) The State Department of Fish and Wildlife shall complete and maintain a statewide inventory of artificial obstructions in order to prioritize enforcement actions based on the needs of native migratory fish. This prioritization shall include, but need not be limited to, the degree of impact of the artificial obstruction on the native migratory fish, the biological status of the native migratory fish stocks in question and any other factor established by the department by rule. The department shall establish a list of priority projects for enforcement purposes. Priority artificial obstructions are subject to the State Fish and Wildlife Commission’s authority as provided in ORS 509.625. Unless requested by persons owning or operating an artificial obstruction, the department shall primarily direct its enforcement authority toward priority projects, emergencies and projects described in subsection (4) of this section. The priority project list shall be subject to periodic review and amendment by the department and to formal review and amendment by the commission no less frequently than once every five years.

(4) A person owning or operating an artificial obstruction shall, prior to construction, fundamental change in permit status or abandonment of the artificial obstruction in any waters of this state, obtain a determination from the department as to whether native migratory fish are or historically have been present in the waters. If the department determines that native migratory fish are or historically have been present in the waters, the person owning or operating the artificial obstruction shall either submit a proposal for fish passage to the department or apply for a waiver
pursuant to subsection (7) of this section. Approval of the proposed fish passage facility or of the
alternatives to fish passage must be obtained from the department prior to construction, permit
modification or abandonment of the artificial obstruction.

(5) Consistent with the purpose and goals of the Oregon Plan, the department shall seek coop-
erative partnerships to remedy fish passage problems and to ensure that problems are corrected as
soon as possible. The department and the person owning or operating the artificial obstruction are
encouraged to negotiate the terms and conditions of fish passage or alternatives to fish passage,
including appropriate cost sharing. The negotiations may include, but are not limited to, consider-
ation of equitable factors.

(6) The department shall submit a proposed determination of the required fish passage or alter-
natives to fish passage to the commission for approval. The determination may be the result of the
negotiations described in subsection (5) of this section or, if no agreement was reached in the ne-
gotiations, a determination proposed by the department. If a protest is not filed within the time pe-
riod specified in ORS 509.645, the proposed determination shall become a final order.

(7)(a) The commission shall waive the requirement for fish passage if the commission determines
that the alternatives to fish passage proposed by the person owning or operating the artificial ob-
struction provide a net benefit to native migratory fish.

(b) Net benefit to native migratory fish is determined under this subsection by comparing the
benefit to native migratory fish that would occur if the artificial obstruction had fish passage to the
benefit to native migratory fish that would occur using the proposed alternatives to fish passage.
Alternatives to fish passage must result in a benefit to fish greater than that provided by the arti-
ficial obstruction with fish passage. The net benefit to fish shall be determined based upon condi-
tions that exist at the time of comparison.

(c) The State Fish and Wildlife Director shall develop rules establishing general criteria for
determining the adequacy of fish passage and of alternatives to fish passage. The general criteria
shall include, but not be limited to:

(A) The geographic scope in which alternatives must be conducted;
(B) The type and quality of habitat;
(C) The species affected;
(D) The status of the native migratory fish stocks;
(E) Standards for monitoring, evaluating and adaptive management;
(F) The feasibility of fish passage and alternatives to fish passage;
(G) Quantified baseline conditions;
(H) Historic conditions;
(I) Existing native migratory fish management plans;
(J) Financial or other incentives and the application of incentives;
(K) Data collection and evaluation; and
(L) Consistency with the purpose and goals of the Oregon Plan.

(d) To the extent feasible, the department shall coordinate its requirements for adequate fish
passage or alternatives to fish passage with any federal requirements.

(8) A person owning or operating an artificial obstruction may at any time petition the com-
misson to waive the requirement for fish passage in exchange for agreed-upon alternatives to fish
passage that provide a net benefit to native migratory fish as determined in subsection (7) of this
section.

(9)(a) Artificial obstructions without fish passage are exempt from the requirement to provide
fish passage if the commission:

(A) Finds that a lack of fish passage has been effectively mitigated;

(B) Has granted a legal waiver for the artificial obstruction; or

(C) Finds there is no appreciable benefit to providing fish passage.

(b) The commission shall review, at least once every seven years, the artificial obstructions exempted under this subsection that do not have an exemption expiration date to determine whether the exemption should be renewed. The commission may revoke or amend an exemption if it finds that circumstances have changed such that the relevant requirements for the exemption no longer apply. The person owning or operating the artificial obstruction may protest the decision by the commission pursuant to ORS 509.645.

(10) If the fundamental change in permit status is an expiration of a license of a federally licensed hydroelectric project, the commission's determination shall be submitted to the Federal Energy Regulatory Commission as required by ORS 543A.060 to 543A.410.

(11) To the extent that the requirements of this section are preempted by the Federal Power Act or by the laws governing hydroelectric projects located in waters governed jointly by Oregon and another state, federally licensed hydroelectric projects are exempt from the requirements of this section.

(12) A person subject to a decision of the commission under this section shall have the right to a contested case hearing according to the applicable provisions of ORS chapter 183.

SECTION 7. The State Department of Fish and Wildlife shall adopt rules under section 3 of this 2019 Act in time for the rules to become operative no later than one year after the effective date of this 2019 Act.

SECTION 8. No later than September 15, 2028, the State Department of Fish and Wildlife shall submit a report, in the manner provided by ORS 192.245, to the interim committees of the Legislative Assembly related to environment and natural resources on the identified environmental and economic impacts of voluntary projects authorized under the program established by the department pursuant to section 3 of this 2019 Act.

SECTION 9. This 2019 Act being necessary for the immediate preservation of the public peace, health and safety, an emergency is declared to exist, and this 2019 Act takes effect on its passage.
