Relating to behavioral health; and declaring an emergency.

Be It Enacted by the People of the State of Oregon:

SECTION 1. (1) The Improving People’s Access to Community-based Treatment, Supports and Services Program is established in recognition of the shortage of comprehensive community supports and services for individuals with mental health or substance use disorders, leading to their involvement with the criminal justice system, hospitalizations and institutional placements. The purpose of the program is to address this need by awarding grants to counties and Oregon’s federally recognized Indian tribes to establish evidence-based and tribal-based programs to provide the needed supports and services.

(2) The Improving People’s Access to Community-based Treatment, Supports and Services Grant Review Committee established in section 3 of this 2019 Act shall adopt rules for administering the program, including rules:

The funds may not be used for a purpose other than the programs providing supports and services for which the grants were awarded.

(4) If unallocated funds remain at the conclusion of the grant acceptance period, the committee may establish a supplemental grant period and distribute the unallocated funds to the counties or Oregon’s federally recognized Indian tribes that received grants.

(5) Up to 20 percent of the funds in the account may be used for operating a statewide program to support the design and implementation of community-based services, including but not limited to:

(c) Statewide training, provided in-person and remotely, for grantees and nongrantees, focused on improving outcomes for the target population;

(d) Making resources available to district attorneys and defense attorneys for consultation on cases involving defendants with complex behavioral health issues;

(e) Developing or strengthening a centralized system to make available to communities practitioners in professional specialties for which there is a shortage, including practitioners of addiction medicine and psychiatry; and

(f) A one-time investment in information technology to support the data system needs for the evaluation, accountability and innovation components of the program.

(6)(a) The committee shall procure and enter into contracts for goods, services and personal services related to the creation, operation, maintenance and management of information technology systems for the purpose of carrying out this section.

(C) For applications from federally recognized Indian tribes, a report of the input from the local public safety coordinating council and, to the extent feasible, an explanation of how the input was incorporated into the design of the program, supports and services.

(D) An agreement to screen all participants receiving supports and services funded by the grants for potential eligibility for medical assistance and to assist eligible participants to apply for medical assistance, including an agreement for a process for sharing data and protecting the confidentiality of recipients among the program participants.

(E) A process for program partners, participating jails and hospitals to:
