

To whom it may concern. This bill or legislation you are working on is not going to fix any thing with the passing of this bill. There are 2 common sense things that need to be done before any of this.

1. Oregon need to address the mental health issues that play into this instead of kicking the down the road farther. This should of been done years ago but the legislature just keeps turning there head & a blind eye to this issue.

2. Oregon also needs to put teeth in the law for these gang shootings that does not let these criminals out in short periods of time after being involved. The rehabilitation of these gang bangers should be appearant buy now that "IT DOESN'T WORK" period. & they all know if they commit a crime or shoot someone they will only do a short jail term. You can look through your records of these folks find the patterns & deal with those, don't punish the law abiding citizens for the crimes of a few.

I could gone on forever about this subject forever. BUT REMEMBER THIS "DON'T PUNISH THE MASSES FOR THE CRIMES OF A FEW"

This problem is going to take a longer time to fix that this short session. This short session deal was originally set up to fine tune laws that were set up in the previous long sessions that problems were discovered with & needed to be dealt with before the next long session. Get back to doing what the session was set up for not trying to take advantage of your super majority status. Don't waste time passing laws that will fix nothing that has been done to many times before.
