Dear Oregon Legislators:

I am strongly in favor of Climate Legislation. I understand that some Legislators feel that Climate Legislation will effect the economy negatively, and certainly that should be a concern. However, I believe that no matter the risks, which I feel can be mitigated by smart business, technology and legislative action, we must move boldly forward now for our children, and the children of the world. Please vote yes on this important legislation, and if you continue to have concerns, please work as a bipartisan body to continue to change the bill. Let's begin now to take action against the Climate Emergency!
