Subject: Support for Climate Legislation for Oregon
Date: Sunday, February 2, 2020 12:12:30 PM

Hello,

I'm writing because I support strong climate legislation for Oregon's - and the world's - future. I'm a parent who is scared for my child's future - I lay awake at night worrying about what this world will be like when she's my age. I try to live an environmentally friendly life, but individual action just can't make that much difference. We need change at the local, state and national level and I support any actions by my state government to address the climate crisis now.

Thank you,

Doug Glancy
