Greetings,

As an registered voter, district 9 PCP, and farmer. I oppose LC19 the 2020 version of the "Cap and Trade" bill. This will take away jobs in Oregon and cause more poverty. The bill is vague in their description of what will happen to the thousands of displaced businesses and employees. Oregon is already a very green state. Adding taxes on the backs of your constituents then trading the carbon credit to gross polluters in other locations is not going to save the earth. This pyramid scheme reeks of funds, banks, politicians, and billionaires as fattening their pockets off the backs of hardworking Oregonians. Please vote it down and/or allow the people to vote. You work for us so you should be listening to us. I have seen the supporters of the bill and it consists of big businesses, unions, not for profits tied to the UN, and people hoping to get rich off of it passing. Do not sell us out, and remember your acceptance of the bill will forever be a scar on your voting record. We will not forget what you choice was when we go to the voting booths.
