

I'm writing to state my support for HB 4107 (AKA - Anti-Discrimination Act fo 2020)

As cultural and racial diversity continues to lag in Oregon's school and business administrations, issues relevant to under-represented populations are still frequently overlooked in the development and enforcement of policies. When these policies block families from finding shelter because they don't have a bank account, or keep children from attending school because of their hairstyle, the impact is real and devastating.

I believe legislative protection is crucial to ensure equitable application of policies for *all* Oregonians, regardless of the shape of our follicles or our access to credit cards.

Thank you for upholding the integrity of our state government.
