Subject: Cap and Trade Legislation Lies

Representative Boshart;

Rather than restate, I would like to address my concerns by copying a correspondence sent earlier to Sara Gelser:

This correspondence is an meant to express my concerns with the attempt by the Oregon governing body to force the citizens to accept the blatant destruction of this state and its economy.

As a business owner, homeowner, scientist (yes, I have published my work and have been employed in scientific work) and a rational thinking individual, I am at a loss as to why the legislature believes that an overt transfer of wealth will atone for the misconceived lies of 'climate change' or whatever you may call it. For what reason? You may personally believe that we 'have to do something' is the proper approach, but this is not what the citizenry you are representing believes. I also must address the fact that the lies that we are supposed to accept, and you have apparently accepted, are rooted in the immoral destructive forces of communism as stated early in the 20th century by those intent on taking control of the population by force.

Every effort must be taken to stop this insanity and the re-election of those who continue to perpetrate their desire to control. I do not believe, as has been recently stated by those in the Democrat party, that the voters' do not know what they are doing' while the elected officials do. I challenge you and the legislature to prove beyond a reasonable doubt any of the pseudo-science. If you believe that you can accomplish this, then you do not understand the scientific process.

Should you continue in your endeavors, you will be part of the body responsible for the loss of businesses, homeownership and breaking apart of families. The consequences are dire and will have long lasting effects in this world and elsewhere.

I am not sure if I expect a reply but your comments are welcome.

Stephen Poole
