Subject: SB 1530 Support
Date: Monday, February 3, 2020 5:17:50 PM

Hello,

I am a public high school teacher, and today my school's student newspaper dedicated an entire two-page layout (w/multiple articles) about climate change and the decisions we all can make to help create the type of mass movement that we need in order to help ensure a livable planet for future generations of people and animals.

Our youth understand the import of our collective actions, and in their lifetimes they've seen our politicians talking a big game about the environment (and our role in its stewardship), while usually not actually legislating as though it's a priority.

I support SB 1350 with improvements, and I encourage our great state of Oregon to provide leadership to the rest of our country in enacting effective meaningful cap-and-trade policies, ...to be the leaders our children, and our grandchildren, deserve.

Please be those leaders.

Sincerely,
Daniel R. Kumprey
